

You are invited!

Cloud Solutions Architect Certification

This Professional Cloud Solutions Architect (PCSA) certification is designed for you to successfully navigate and support the adoption, development and performance optimization of Cloud solutions and services in the enterprise and IT ecosystem. As solution architects you need to understand the impact that cloud is having on the business and information architecture, application design, data management, and security. You need to be familiar with the topology and ecosystems that are being created as a result of increasing adoption of cloud technologies and operating models.

The PCSA certification is designed for senior technology professionals who are designing the next generation of IT solutions and infrastructure. The training covers critical concepts and supplements this with hands-on, practical, exercises and case studies. The certification refers to leading technologies, platforms and cloud standards to provide a real-world context and cement these concepts.

Join us for this not to be missed world-class training!

Professional Cloud Solutions Architect

This certification helps you understand the impact that cloud is having on business and information architecture, application design, data management and security architecture; and the topology and ecosystems that are being created as a result of increasing adoption of cloud technologies and operating models.
